“Distribution driven by technical DNA. All under one team.”

Marine Air Conditioning & Refrigeration

High-performance marine HVAC and refrigeration. Built to last.

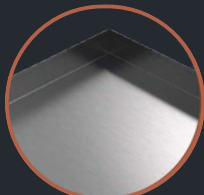

Flow Marine Systems is a US manufacturer specialising in HVAC and refrigeration systems for demanding marine applications. Every system is a bespoke solution, engineered to withstand the harshest conditions at sea.

TITANIUM CONDENSERS
Superior corrosion resistance

COPPER-ON-COPPER EVAPORATORS
Maximum heat exchange capacity

316L STAINLESS STEEL CHASSIS
The most corrosion-resistant in its class

NON-PROPRIETARY COMPONENTS
Spare parts available in any port worldwide

Official HVAC supplier to Numarine Yachts, one of the world's most prestigious luxury motor yacht builders

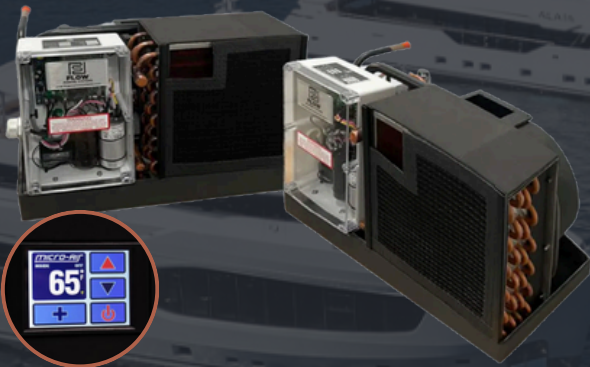

PRODUCT RANGE

Titanium Marine Chiller
Mid-range yachts – Superyachts
from 24.000 - 180.000BTU/h

Direct Expansion Units
Refit & Direct Replacement
from 7.000 - 48.000BTU/h

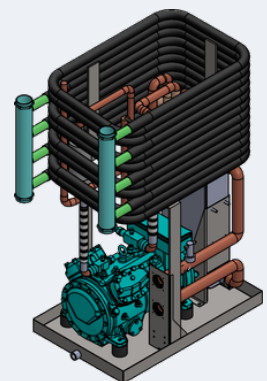

Self-Contained Units
Compact units – individual zones
from 7.000 - 24.000BTU/h

Air Handlers
Chilled Water
from 7.000 - 36.000Btus/h
Direct Expansion
from 7.000 - 24.000BTU/h

Custom Made Units

Refit – Shipyards – Large vessels

IMO Marpol Certification

Systems approved for discharge in protected marine areas

Selmar Technologies has been manufacturing in Marsala, Sicily for over 40 years. Their reverse osmosis systems eliminate 100% of contaminants, producing high-purity drinking water with minimal energy consumption. Scalable from sailing yachts to superyachts and industrial applications, their systems are installed in prestigious shipyards worldwide.

Exclusive distributor for Spain – NSP Marine Solutions

PRODUCT RANGE

DC Series 12-24V

Sailing yachts – Vessels without generator
from 15 to 50 L/h

Modular Series

Yachts – Fishing vessels – Powerboats
from 30 to 300L/h

Compact Series

Mid to large yachts – Superyachts
from 110 to 950L/h

Atlantic SW

Megayachts – Commercial vessels
Land-based use
from 600 to 8.340L/h

Seaberia / Seaberia PRO

Mid to large yachts – Superyachts
from 100 to 950L/h
Air conditioning with rotary compressor
from 6.000 to 18.000 BTU/h
